

SUMMARY				SUMMARY
This spreadsheet provides a detailed record of employee information for a workforce of over 1,000 individuals, organized into several key areas:				
Employee Profiles: Contains essential personal data including names, ages, and contact information like emails and phone numbers.				
Organizational Structure: Details the department each employee belongs to (e.g., DevOps, Finance, Sales), their assigned region, and their current employment status (Active, Pending, or Inactive).				
Performance and Compensation: Tracks annual salaries and performance ratings, which range from "Poor" to "Excellent."				
Employment History: Records specific join dates and indicates whether an employee is authorized for remote work.				
The primary purpose of this dataset is to serve as a centralized hub for personnel management, allowing for the analysis of departmental distribution, salary benchmarking, and workforce performance tracking.
